A weekly publication for Gallaudet staff & faculty
Vol 10, No. 4. Oct. 22, 1979

Staff development survey results are tabulated

by Vickie Walter

Programs on Time Management and Career Development for Women will probably be held here before Christmas. And you can look for another 10 to 20 Staff Development programs at Gallaudet during the coming year, all designed to help faculty and staff develop new work skills or improve existing ones.

The upcoming programs will be developed in response to a training needs survey sent to all employees by Sheila Curran, the College's coordinator of training and development. Results of the survey are being used to assess what people have done in the past and the types of programs they would like to do in the future.

The survey is taking the place of a Staff Development Programs booklet that appeared around this time last year. The booklet, you may remember, presented a list of programs offered during the year and a two-week deadline to sign up for them. But things have changed this year. "My philosophy is that Staff Development is an ongoing thing," Curran explained. "It's hard for people to know their needs for the entire year so far in advance." So this year, each program will be announced two to three months in advance, hopefully a short enough time period for people to coordinate the courses with their schedules. A professional development booklet, which will discuss professional development programs in a general way and list programs and services offered through other offices both on and off campus will also be distributed to employees.

Preliminary results of the survey are in, with 234 people responding, more than have ever answered Staff Development surveys in the past. Of these, 127 said they would definitely participate in courses or seminars, and another 102 expressed interest if they had sufficient time and the right programs were offered. Many faculty members as well as staff returned the survey.

Curran will be looking closely at people's interests as she develops programs over the coming year. Areas of high interest appear to be budget preparation, change at

Gallaudet, new developments in deafness, setting performance standards and objectives, and interviewing skills. These programs could be presented by speakers from Gallaudet.

In addition, outside speakers may be sought for other areas of interest such as personal financial planning, writing proposals, reports and memos, organizational development strategies, how to introduce change, designing efficient office support systems, long-range planning and managing for performance improvement.

Continuing Staff Development programs will include a weekly orientation to Gallaudet and EEO for new employees, and frequent new supervisor briefings. Special programs related to deafness and programs of particular interest to office employees will be offered on a regular basis. An individual training course in how to communicate effectively on the telephone can be taken anytime, and the Staff Development office also offers career counseling.

Most of the programs will be held on campus in one or two day sessions. Cost of programs offered by Gallaudet instructors is nominal, and workshops led by outside speakers will probably cost from \$50 to \$75 per day. Any staff or faculty member at Gallaudet, MSSD or KDES can participate in as many programs as they choose, subject to supervisor approval and available funds. Ideas for speakers or volunteers to teach courses are also being solicited.

The Staff Development programs are sponsored by the Office of General Services. An Excel Program, where office workers got together to discuss different aspects of their jobs and how they could better work on their professional development, finished the end of August. A series of pre-retirement seminars which began in September is proving to be a big success, with a high of 48 participants. These dinner-lectures, followed by discussion, focus on a different aspect of retirement each week. If you want to get in on the last one on Nov. 5, which

continued on page 2

Participants at EXCEL program recently held here get together to discuss different aspects of their jobs and discuss how they can work on staff development programs during the coming year.

Lecture series scheduled

by Donna Chitwood

The Chamber of Commerce of the United States is providing a "Four-Part National Chamber Classroom Lecture series" through Gallaudet's MBA program this year.

The series, which began last Monday with a talk by Chamber of Commerce executive Richard L. Breault, will give MBA students and faculty at Gallaudet and other member schools of the Washington Consortium of Colleges and Universities opportunities to learn about interpretations of the economy important to future decision makers.

Business administration department chairman Suleiman M. Bushnaq calls the lecture series "an excellent vehicle for learning and understanding the problems associated with our economy and the vital role business plays in the United States."

Breault, vice president for Program and Federation Development of the United States Chamber of Commerce, spoke on the American economy and the free enterprise system. He brought to the lecture vast experience supervising and coordinating the business federation's professional staff and in providing basic support to action programs aimed at achieving the organization's objectives.

Further lectures are scheduled for

Tuesday, December 4, 1979; Friday, February 15, 1980; and Wednesday, April 2, 1980. All lectures will be in Room 274, Hall Memorial Building from 3:00 to 6:00 p.m. The lecturers are all Chamber of Commerce officials with various fields of expertise.

Question and answer periods will follow each lecture. In addition, Continental Forest Industries will sponsor post-lecture receptions.

The series is open to MBA Consortium faculty and students and others by invitation.

The MBA program is in its second year. It was established to help meet the educational needs of hearing impaired individuals interested in business careers. Business administration is one of the most popular undergraduate majors at Gallaudet.

EPOC participants!

A reminder to faculty, staff and students; the deadline to apply for spring internships and coop placements at EPOC is November 1.

Serendipity

Library Bits & Pieces

ERIC database

by Carolyn Jones

Approximately a year ago, the College Library decided to establish several Selective Dissemination of Information (SDI) computer searches to be conducted each time the ERIC (Educational Resources in Education) database was updated. These searches are on broad subject areas related to the deaf. This scope works to the user's advantage since helpful items may be noted in the printout that would be missed in a computer search of narrower range. The constant updating keeps the information current. A quick search through one of the SDI printouts may yield enough pertinent bibliographic information for a term paper or a report.

Some of the subjects, all deaf-related, are elementary education, law, psycho-social issues, adult education, employment and audiology. Anyone is welcome to use these SDIs in the Library. They are kept in a file in the reference area. Ask for assistance at the Information Desk. You may photocopy large sections or copy scattered items from the printout. It's up to you. We only hope they will be helpful.

Information retrieval

by Cathy Dickstein

The College Library has developed a capability to search portions of its collection through our campus computer system. The information retrieval system is called SIRE or the Syracuse Information Retrieval Experiment, and was originally developed at the School of Information Studies at Syracuse University. The SIRE software package was modified for use here. SIRE allows the user to query its databases through a set of simple commands that are easy to learn. The SIRE system is available for anyone on campus to use directly or through the Library.

Currently there are three databases available through the SIRE system: (1) The College Library's Deaf Collection database which now con-

tains over 5300 titles of materials in the areas of deafness, hearing, deaf education, audiology and sign languages. This database is updated monthly with new materials added to the collection and old materials that have not yet been recataloged through the computer; (2) The Linguistics Research Laboratory (LRL) database contains 900 titles of preprints, working papers, bound articles and other materials on sign language which are maintained in the LRL document collection; (3) The College Library's Recent Acquisitions database consists of all materials cataloged by the Library in the current month. This database is replaced on a monthly basis with the newly cataloged materials for that month.

A user's manual for the SIRE system has been prepared and is available from the Library. If you are currently a user of the campus computer, you can obtain a copy of the manual by issuing the following MONITOR command:
.PRINT LL: = MAN:SIRE.MAN/
FORMS:NARROW

For more information on SIRE, contact Jim Bourg in the College Library, x5573 (voice), x5575 (TTY).

Accessions list

The College Library is currently distributing a new and improved version of our monthly accessions list on microfiche. The accessions list includes all new material added to the Gallaudet and MSSD libraries during the month. Checking the list monthly allows you to see what the Library has received in any of your fields of interest, professional or personal.

In the past, the list was arranged by Dewey number. Now, the list is arranged alphabetically by subject for greater convenience. The new format gives full author, title and call number, instead of the abbreviated information given in the old version.

The Library will automatically send a copy of the new list to anyone who received the accessions list in the past. If you are not on our mailing list and would like a copy, contact Anne Calby at x5572 (voice) or x5575 (TTY).

Business Affairs directory

Business Affairs provides a series of support services. If you have any questions or comments, call:

Staff Personnel Services, Patricia Potter, ext. 5519

Grounds Care, James Hull, 5210 or Martin Willigan, 5224

For routine building repair requests, telephone the Physical Plant or Work Control Center at ext. 5200. If you don't receive satisfactory information from the above persons, you can call Jerry Lee, ext. 5517, for the first 10 numbers (through Bookstore), Sam Wagner, ext. 5150 for numbers 11 through 14 (through General Accounting) and Tom Lillis, ext. 5231 or John Gateau, ext. 5224 for the last six numbers. In addition, you can call Paul Nance at ext. 5051 if you wish to talk about any of the services mentioned in this list.

Staff development

Continued from page 1

will explain the Civil Service Retirement System, call Curran on 5515.

An estimated 500 people will participate in one or more of these programs this year, an increase of 200 people from last year. "It's very unusual for a college to have such a large Staff Development program as Gallaudet," said Curran. "Gallaudet would like to develop the skills of the people in its work force as much as possible. Some of this can be provided by on-the-job training, but some can be done better in a group." Establishing a comprehensive professional development program on Kendall Green was one of the goals developed for fulfilling the mission of Gallaudet.

About 12 people are needed for each program, but if the surveys are any indication, a much larger number than that will be participating. Special programs are also available for smaller numbers of people in specific departments, tailored to each department's special needs.

Curran also hopes to make use of resource people at Gallaudet: "A lot of people are doing interesting and innovative things here. There are experts in all different fields at Gallaudet and we want to capitalize on their experience by sharing it."

Hopefully, the Staff Development programs offered during the coming year will help employees enhance the goals they have for future positions at Gallaudet. Many of the programs will focus on specific group needs, trying to draw together people with similar backgrounds and

Sheila Curran

experiences in intensive training. The programs will go from the GED level up through management and will try to be relevant to employees' present positions as well as encouraging career development.

All programs will encourage group participation. "It's very much a two-way street," Curran emphasized. "People need to let us know of the programs they need. Second, they need to bring out their own ideas and discuss them with people as they can get a better idea of what others feel."

Did you return your Staff Development survey? If not, do you have any suggestions for programs you would like to see happen during the coming year? Does your office or department have a need for a specific program not mentioned here? If so, let Sheila Curran know. She'll be glad to discuss your needs with you and try to help.

President's Office Notes

In 1969, the Gallaudet College Board of Directors set up a "Committee on the Role and Function of Gallaudet College." * Miss Mary Switzer, then Vice President of the World Rehabilitation Fund, was chairperson of this group. Members were selected to include representatives from the Board of Directors, people involved in education of the deaf, teacher education, and deaf people themselves. The Committee addressed itself to the future of Gallaudet College, and as the result of their study published a report entitled A New Era. This report was the beginning of the College's emergence as a multipurpose institution; and the present day Board of Fellows grew out of the "Committee on the Role and Function of Gallaudet College."

The Board of Fellows' function is to review the responsibilities, programs, structures and results of the College as an educational institution. Generally, they meet annually and discuss specific areas as designated by the Board of Trustees, the President of the College, the Fellows themselves, or any combination thereof. Following a few days of meetings, the Fellows formulate and present recommendations to the College and to the Trustees.

This year, the Board of Fellows will meet on November 14, 15, 16; the main area for this year's study will be the Division of Public Services. Dr. Thomas Mayes and his staff are involved on the development of the agenda, which includes presentations by various units within Public Service Programs and discussion of questions and issues raised by both the Fellows themselves and the Public Service staff. We are looking forward to a productive meeting.

Current members of the Board of Fellows are: Dr. Howard F. Aldmon, Mr. Phillip Bravin, Dr. Ben D.

Hoffmeyer, Dr. Stanley D. Ikenberry (newly appointed president of the University of Illinois!), Dr. Elizabeth Koontz, Dr. Edgar L. Lowell, Ms. Deedra Blaylock Morrison, Dr. Robert Sanderson, Dr. George Sibley, Dr. Herman E. Spivey, Dr. Richard Thompson, and Dr. Kenneth R. Williams.

*It should be noted that the Board of Directors has changed its name to the Board of Trustees; they have undergone a self-study and as a result have a new structure and new Bylaws. This will be elaborated on in a future On the Green.

Energy tips

by Jim Hull

FIREPLACES: Don't use your fireplace for supplemental heating when your furnace is on unless you take one of the measures suggested below to lessen the loss of heated air from the house.

1. Lower the thermostat setting to between 50° and 55°. Some warm air will still be lost, but the furnace won't have to use as much fuel to heat the rest of the house to these temperatures as it would to raise the heat to 65°.
2. Close all doors and warm air ducts entering the room with the fireplace 1/2 to 1 inch. Air needed by the fire will be provided through the open window, and the amount of air drawn from the rest of the house will be reduced.
3. If you have a simple open masonry fireplace, consider installing a glass front or a glass screen. This will cut down on the loss of warmed air through the flue.

Classified Ads

FOR SALE: Barbell for weight lifting. Bar with 55 pound weights. Perfect Christmas gift. Call voice 431-2758 (home) or x5815 (work).

FARM MARKET: Every Saturday from 9:00 a.m. to 2:00 p.m., 2104 E. Pratt St., Baltimore. Organically grown fruits and vegetables, no-sugar apple cider, apples, country cheese, jams and jellies, and honey. All at incredibly low prices. Contact Becky or Mike Tabor, (301) 327-8391.

FULLY FURNISHED BEDROOM with adjoining porch available in three bedroom townhouse one block from Gallaudet. Townhouse has spacious living room, dining room, kitchen w/dishwasher, two bathrooms, porch and small front and back yard. Only \$130.00 per month plus 1/3 utilities. Townhouse located at 1127 West Virginia Avenue, NE. Contact Laureen Tracy or Sylvia Nystrom, x5594, V/tty day, 397-5669 voice evening.

WOULD YOU LIKE TO SKI in Aspen, CO for a week of your Christmas vacation? The Aspen Camp School for the Deaf offers special rates to deaf skiers. For information contact Rosemary Winder, Social Work Program in the Sociology Department located in the Old Counseling Center building, or call 5342.

FOR SALE: Stereo record players with AM/FM radio, old "portable" style, but too big to carry comfortably. \$50.00 Contact P.O. Box 1131, Gallaudet.

MSSD notes

Approximately 340 MSSD students, a sizeable increase from last year's enrollment of 270, began classes a few weeks ago. New students and their parents arrived right after Labor Day weekend for a two-day orientation program, with the rest of the students arriving a couple of days later.

Danny Hines, MSSD's first exchange student to travel outside this country as part of the American Field Service program, told students and teachers a little about his summer in Australia at a special assembly recently. Danny detailed some of his experiences, with the help of a slide presentation and photographs. The AFS exchange program brought Wutze Niethammer, a student from Germany, to MSSD last year.

Phone numbers

Due to increased demand, Dining Services has instituted a catering telephone, to be use to contact the catering manager. It will be equipped with a message recorder when the manager is unavailable. The new number is 5476. Numbers for all other business are 5474 and 5475, and the room reservations number is 5477.

The Metropolitan Police Department has changed its tty number to 727-9334. The new number is part of a new communications system being implemented for the Police Department.

The U.S. Consumer Product Safety Commission has recently installed a tty to take calls from 8:30 a.m. to 8:00 p.m. The new toll-free numbers are (800) 638-8270, national; and (800) 492-8104 for Maryland residents. You can also leave a message nights or weekends. The Commission can answer questions about hazardous products or take reports from consumers about injuries with household products.

Grassroots, a crisis intervention center in Howard County, has a tty available for persons to call for such things as contacting friends or relatives, emergency counseling, general information and referrals to other deaf services. Their tty is 730-1533 and voice number is 730-3090. The center is in Columbia, MD. You can also call tty 461-1111 for fire, ambulance or police in Howard County.

Do you subscribe to Gallaudet Today? If not, why not? For only \$5 a year you can get this quarterly magazine that will help you keep up with what's happening around campus. Don't miss the first fall issue. Subscribe now by contacting the Alumni & Public Relations Office.

Personalities

Vincent

Caplicki

Diane Vincent is the acting coordinator of the Associate of Arts degree program in interpreting for the deaf. She replaced John Reiman, who after seeing the program through its first year, has departed for Oregon. Before coming to Gallaudet, Diane worked in freelance and classroom interpreting situations and as an interpreter referral service coordinator. She holds a BA in deaf education and a master's degree in special education.

In her new position, Diane will be responsible for academic advisement to students in the AA program, teaching interpreting courses and laboratories, and arranging class schedules.

Assisting Diane is **Cathy Caplicki**, the new practicum supervisor for the AA program. Cathy will design and supervise practicum experiences for the 13 students in the second year class. Cathy joins us from San Diego, where she was an interpreter, sign language instructor, interpreter trainer, and consultant. She has a BA in psychology and has completed courses in interpreting and interpreter training through the National Interpreter Training Consortium.

Johnson

Steve Johnson is a small equipment mechanic with Physical Plant — Central Utilities. Johnson makes necessary electrical and mechanical repairs to all types of floor care equipment. His previous experience encompasses both electrical and mechanical repair. A local resident, Johnson has studied at Prince George's Community College.

Rosie Freeman has been appointed Coordinator of Admissions and Records at MSSD. In her new job, Rosie will coordinate student admissions activities at MSSD, including policy implementation and applicant processing. She will develop and maintain permanent student records and serve as MSSD's registrar. Rosie is no stranger to MSSD, having worked for five years as administrative secretary to the principal. Before that, she did public relations work with the District of Columbia Department of Vocational Rehabilitation and the Federal Bureau of Prisons. Rosie replaces Lupe Bryant and Diane Jenkins, who have both retired to housewife and mother status.

Gallaudet College is an equal opportunity employer educational institution. Programs and services offered by Gallaudet College received substantial financial support from the Department of Health Education and Welfare.

Historical Notes

by Francis C. Higgins

1900 . . .

Continued from last week

Some of the student associations were reorganized and new officers were elected. From the city newsdealers, magazines, newspapers and weeklies were ordered by the Men's Reading Room Club and kept in the Reading Room on the first floor of College Hall, in the rooms now occupied by the Student Accounts Office and Payroll and Accounting Offices.

The Saturday Night Dramatic Club also underwent reorganization. There was an election of officers and Committees on Plays and Arrangements. In order to boost attendance, it was

proposed that a fine of five cents be levied against any members who were absent from a meeting.

The Gallaudet College Athletic Association (for men students only), meeting in the Lyceum on Saturday mornings, voted to meet semi-monthly. The association had complete responsibility for scheduling all games in football, basketball, baseball and track and for hiring coaches from members of the faculty. There was no Physical Education Department then.

As for the coeds' societies and clubs, there were the O.W.L.S. sorority, established in 1892 and now the Phi Kappa Zeta; the Coeds' Reading Room in the old Fowler Hall, the Jollity Club and a new club, the Serving Club. Shortly after the

"The White Statue," presented by the Saturday Night Dramatic Club, November 30, 1901.

commencement of the new College year, the O.W.L.S. held a banquet to celebrate the founding of its sorority.

In all the years, the secret initials of this sorority have intrigued the male students who, having been unable to get the sisters to divulge their meaning, had come up with their own interpretation as to the full name of the sorority, much to the sisters' amusement.

The correspondent announced the demise of the Xi Phi Sigma Fraternity which had been in existence for the previous six years. The members, for reasons not given, felt that it was best to dissolve the society and establish a new one. Consequently, a committee was set up to study the matter of forming a new fraternity.

As was the case this summer and fall (1979), much rain was experienced during those opening days in 1900. The writer, at that time, was of the opinion that the blame rested with Jupiter! Old Sol was suspected as another culprit.

The College Literary Society, having previously held its monthly meetings on Saturday mornings in the Lyceum, voted to meet thereafter in Chapel Hall. Poor ventilation and a crowded condition were the reasons given for the move from the Lyceum, the large room with the high ceilings at the head of the stairway of the third floor of College Hall. This room is now occupied by the Office

of Curriculum Development and Research (Room 311). The walls of the Lyceum were once adorned with large photographs of all the graduating classes beginning with Melville Ballard, the first and only member of the Class of 1866.

Every Sunday afternoon the whole student body assembled in Chapel Hall to attend the Ephphatha Sabbath School Concert. Sermons were presented by members of the College faculty. At one of the fall concerts, shortly after the opening of school, President Gallaudet announced that \$48.56 had been collected the previous school year. He remarked that appeals for funds had been received from: (1) The school for the deaf established in Chee Foo, China by Mrs. Anna Mills; (2) The French mission to the deaf in Paris; and (3) The sufferers of the terrible storm at Galveston, Texas. It was voted to donate one-third of the collection to each cause.

Looking back on those days in 1900, one may surmise that College life was no different than it is today. The students, then as now, had their school work, socials, athletic contests, organizations, etc. Today there are just more of them—students, teachers, organizations and campus buildings. New forms of entertainment have made their appearance but there were also new forms in those days. College life went on as usual.

Wake up with vibrations

A new product has been developed that may be of particular interest to the deaf. It is called a Circadian Clock and it functions as a natural awakening alarm clock that DOES NOT use sound as the waking stimulus. Instead it uses vibration keyed to natural body frequencies.

Set the Circadian Clock for morning wake up and for a vibration cycle time of your choosing — vibration begins at a low frequency and intensity and gradually cycles upward, increasing frequency and

intensity of vibration gradually to awaken you. The Circadian Clock comes with two electromagnetic vibrators that mount easily on any bed. The clock itself is about the size of a conventional clock radio. The Circadian Clock also has a Sleep cycle that help lull you to sleep at night, a Snooze cycle that lets you sleep in, programmable features and a lot more.

The Circadian Clock is available from Electronic Design and Development Engineering, 17351 Murphy Ave., Irvine, California 92714. Phone: (714) 979-9666. The cost of the Circadian Clock is \$179.50.
